

Advancing the Common Good: Issues and Indicators Framework

Resources at www.online.unitedway.org/ACGIndicators

History and context

A short history of how the national framework of goals, issues, and indicators was developed

Issues and Indicators Framework FAQ

This list of frequently asked questions and corresponding answers addresses the history of the framework and its potential uses. It is updated regularly with emerging issues to reflect current feedback by United Ways.

Archived Webinars and Presentations - Advancing the Common Good: National Goals, Issues and Indicators

View archived replays of past webinars on the national framework and download their associated presentations.

Getting Data

Find data that relates to the issues and indicators in the Advancing the Common Good framework at the national, state, and even local level, as available.

Data Availability Matrix

An overall guide on where to find data related to the 12 indicators. The matrix includes a list of the indicators in the framework with sources of national data as well as state and local sources, as available.

National Trends At-a-Glance

This Excel spreadsheet gives you up-to-date data on trends for the 12 national indicators.

National Issues and Indicators At-a-Glance

This document is a handy list of the target issues, intended results and indicators in the national framework complete with data sources.

New National Goals and Indicators Listserv

The new NationalIssuesIndicatorsGoals-L list has been established to encourage dialogue about the challenges with and successes in adopting and adapting to the national issues, indicators and goals. We encourage marketing, resource development, as well as community investment and strategies staff to join in the conversations. Instructions for how to subscribe are included.

Community Initiatives: Tracking Progress and Results

This report summarizes research on 46 initiatives that are creating community-level change, focusing on how the initiatives are tracking changes in community conditions and measuring population outcomes. Includes an inventory of community changes by issue.
